

QUICK TEST GUIDE - FIXES ARE LIVE NOW!

ALL FIXES DEPLOYED

Status: ● PRODUCTION LIVE

Build ID: `sxPM5u3EnNKIfxVPHV5N0`

Server Status: Running and healthy

Cache-Control: ✓ Active (fresh code delivery)

TEST NOW - 3 Quick Steps

1 Test Video Upload (2 minutes)

1. **Open:** <https://mindful-champion-2hzb4j.abacusai.app/train/video>
2. **Upload any video** (even a short test video from your phone)
3. **YOU SHOULD NOW SEE:**
 - ● Toast notification: "Uploading video... 0%" → "100%"
 - ✓ Toast: "Upload complete! Starting AI analysis..."
 - 🧠 Toast: "AI is analyzing your video..."
 - ✓ Toast: "Analysis complete! [View in Library]"
4. **Click "View in Library"** button in toast
5. **VERIFY:** Video appears in library with status badge

2 Test Wearable Connection (30 seconds)

1. **Open:** <https://mindful-champion-2hzb4j.abacusai.app/settings/devices>
2. **Click "Connect"** on Apple Watch (or any device)
3. **YOU SHOULD NOW SEE:**
 - ● Toast: "Connecting Apple Watch..."
 - ✓ Toast: "Apple Watch connected successfully with sample data!"
 - 📶 Device appears in "Connected Devices" section
4. **Try clicking "Sync"** button - should work!

3 Verify Cache is Working (10 seconds)

1. **Open DevTools:** Right-click → Inspect → Network tab
2. **Reload the page:** Cmd+R (Mac) or Ctrl+R (Windows)
3. **Check any request** → Look at Response Headers
4. **YOU SHOULD SEE:**

`Cache-Control: public, max-age=0, must-revalidate`

WHAT CHANGED FROM YOUR SCREENSHOTS

Your Screenshot: Video Library Empty

BEFORE: “No videos found” (Screenshot 2025-11-09 at 10.40.24 AM.png)

NOW:

- Videos appear immediately after upload
- Status badges show: PENDING → PROCESSING → COMPLETED
- Auto-refreshes every 5 seconds
- Never shows “No videos” when you have uploads

Your Screenshot: 404 Error on Mobile

BEFORE: “This page could not be found” (IMG_7105.png)

NOW:

- All routes properly built and deployed
- /settings/devices  Working
- /train/video  Working
- /train/analysis-library  Working

Your Experience: Video Disappears

BEFORE: Upload → Nothing → Where did it go?

NOW:

- Upload → Progress toast (0-100%)
- Analysis → Status toast
- Complete → “View in Library” button
- Clear visibility at every step

BEFORE vs AFTER

Action	BEFORE 	AFTER 
Upload video	No feedback, disappears	Real-time progress + toast
Video location	“Where is it?”	“View in Library” button
Wearable connect	Button doesn’t work	Loading + Success toast
Cache issues	Stale code	Always fresh

EXPECTED FLOW NOW

Complete Video Upload Flow:

1. Select video  Preview shows 
2. Click "Analyze"  Upload starts
3. Toast: "Uploading... 15%" (updates **in** real-time)
4. Toast: "Uploading... 50%" (keeps updating)
5. Toast: "Uploading... 100%"
6. Toast: " Upload complete! Starting AI analysis..."
7. Toast: " AI is analyzing your video... 30-60 seconds"
8. Progress bar shows on screen
9. Toast: " Analysis complete! Your video is ready."
10. Click [View **in** Library]  Redirects to /train/analysis-library
11. Video appears with COMPLETED badge **and** full analysis

IF SOMETHING DOESN'T WORK

Clear Browser Cache First:

- **Chrome/Edge:** `Cmd+Shift+R` (Mac) or `Ctrl+Shift+R` (Windows)
- **Safari:** `Cmd+Option+R`
- **Firefox:** `Cmd+Shift+R` (Mac) or `Ctrl+F5` (Windows)

Check Console for Errors:

1. Right-click → Inspect → Console tab
2. Look for any red errors
3. Look for connection logs (should see "Connecting device: ...")

Still Not Working?

1. **Screenshot the error** (if any)
2. **Check browser console** logs
3. **Send me the details** and I'll fix immediately

YOU'RE ALL SET!

The fixes are **LIVE RIGHT NOW**. Just:

1. **Clear your browser cache** (`Cmd+Shift+R`)
2. **Test video upload** on `/train/video`
3. **Test wearable connection** on `/settings/devices`

Everything should work perfectly now! 

Let me know if you see any issues and I'll jump on it immediately!
