Testing Checklist

Visual Elements

- [] All emojis display correctly
- [] SVG graphics render
- [] Colors are accurate
- [] Text is readable
- [] Spacing is correct
- [] Borders show properly
- [] Shadows visible (where supported)

Layout

- [] Sections properly spaced
- [] Cards aligned correctly
- [] Buttons centered
- [] Mobile responsive
- [] No horizontal scroll

Interactive

- [] All links work
- [] Buttons clickable
- [] Video thumbnail clickable
- [] Play button overlay works

Content

- [] Score displays correctly
- [] Metrics show proper values
- [] Heat map data accurate
- [] Key moments formatted
- [] Lists properly bulleted
- [] Dates formatted correctly

Quick Tips

Adding New Emojis

1. Use standard Unicode emojis
2. Test in multiple email clients
3. Provide fallback text if critical
4. Check size (typically 20-32px)

Modifying Colors

1. Keep sufficient contrast (4.5:1 minimum)
2. Test in dark mode
3. Use hex codes for consistency
4. Consider colorblind accessibility

Adding New Sections

1. Follow table-based layout
2. Use inline styles
3. Include padding for spacing
4. Add border/shadow for depth
5. Test in Gmail first

Troubleshooting

1. Check inline styles present
2. Verify table structure
3. Test emoji rendering

4. Check image paths (if any)

5. Validate HTML structure
