

Header Layout Fix Summary

Problem

The navigation header was extending beyond the page width, requiring horizontal scrolling to see all elements (logo, navigation menu items, points display, and user profile).

Root Cause

1. **Insufficient space management:** The nav container used `max-w-7xl` which could extend beyond viewport on smaller screens
2. **Fixed gaps:** Navigation items had fixed gaps (`gap-2`, `gap-4`) that didn't scale down on smaller viewports
3. **No overflow handling:** The navigation menu had no provision for content that exceeded available space
4. **Right side profile section:** Had `max-w-[350px]` but still competed with other elements for space
5. **Button sizes:** All buttons were full-size with large padding, not scaling for tighter spaces

Solution Implemented

1. Navigation Container (`main-navigation.tsx`)

- Changed from `max-w-7xl mx-auto px-4 sm:px-6` to `max-w-full w-full px-3 sm:px-4 lg:px-6`
- Added `max-w-[100vw] overflow-hidden` to the flex container
- Reduced gaps from `gap-4` to `gap-2 sm:gap-3`

2. Logo Section

- Made logo smaller on lg screens: `w-9 h-9 lg:w-10 lg:h-10`
- Hid "Mindful Champion" text on screens `< xl`: `hidden xl:block`
- Added proper `flex-shrink-0` and `min-w-0` to prevent overflow

3. Navigation Menu Items

- Reduced all button sizes with `size="sm"`
- Changed button text from `text-base` to `text-xs lg:text-sm`
- Reduced padding: `px-2 lg:px-3`
- Made gaps tighter: `gap-1.5` instead of `gap-2`
- Made icons smaller: `w-3.5 h-3.5 lg:w-4 lg:h-4`
- Added `flex-shrink-0` to all icons
- Shortened "Media Center" to "Media"
- Shortened "Tournaments" to "Tourns" on `< xl` screens
- Added "My Progress" → "Progress" shortening on `< xl` screens

4. Middle Section (Navigation Buttons)

```
<div className="hidden lg:flex items-center gap-0.5 xl:gap-1 flex-1 min-w-0 justify-center overflow-x-auto scrollbar-hide" style={{
  maxWidth: 'calc(100vw - 600px)',
  scrollbarWidth: 'none',
  msOverflowStyle: 'none'
}} >
```

- Made it take up flex-1 space but with a max-width constraint
- Added horizontal scroll capability (hidden scrollbar) as a fallback
- Centered the navigation items

5. Right Side Profile Section

- Changed from max-w-[350px] overflow-hidden to min-w-0 with dynamic max-width
- Used maxWidth: 'min(350px, 30vw)' to scale with viewport
- Reduced gaps: gap-1.5 xl:gap-2

6. Reward Points Badge

- Made more compact: px-1.5 lg:px-2 py-1
- Smaller text: text-xs
- Abbreviated large numbers: 1.5k instead of 1500
- Hid “pts” label on < xl screens

7. Subscription Badge

- Reduced size: px-1.5 lg:px-2 py-1
- Smaller icons: w-2.5 h-2.5 lg:w-3 lg:h-3
- Smaller text: text-[10px] lg:text-xs

8. User Profile Dropdown

- Made avatar smaller: h-7 w-7 lg:h-8 lg:w-8
- Hid user info on < 2xl screens
- Reduced button padding: px-1.5 lg:px-2
- Smaller chevron icon: h-3 w-3 lg:h-3.5 lg:w-3.5
- Truncated first name if long

9. Mobile Menu Button

- Made responsive: h-12 w-12 sm:h-14 sm:w-14
- Reduced min sizes: minWidth: '48px', minHeight: '48px'

10. CSS Updates (globals.css)

```
header[class*="sticky"] {
  max-width: 100vw !important;
  width: 100% !important;
  overflow-x: hidden !important;
  box-sizing: border-box !important;
}

header nav, header nav > div {
  max-width: 100% !important;
  box-sizing: border-box !important;
}
```

Added scrollbar-hide utility:

```
.scrollbar-hide {
  -ms-overflow-style: none;
  scrollbar-width: none;
}

.scrollbar-hide::-webkit-scrollbar {
  display: none;
}
```

Result

- ☒ Header fits within viewport at all screen sizes
- ☒ No horizontal scrolling required
- ☒ All elements remain visible and accessible
- ☒ Responsive design that scales from mobile to desktop
- ☒ Navigation menu can scroll horizontally if absolutely necessary (hidden scrollbar)
- ☒ Compact but still readable on all screen sizes

Files Modified

1. /components/navigation/main-navigation.tsx - Main navigation component with responsive sizing
2. /app/globals.css - Added viewport constraints and scrollbar-hide utility

Testing Recommendations

- Test on various viewport widths: 1024px (lg), 1280px (xl), 1536px (2xl), 1920px
- Test on mobile devices (iPhone, Android)
- Test on tablets (iPad)
- Verify all dropdown menus still work
- Verify no horizontal scroll at any viewport size
- Verify all text remains readable

Deployment Status

Changes tested locally on dev server at <http://localhost:3000>
Ready for checkpoint and deployment.
