

Sign-In Page Video Removal - Summary

Overview

Successfully removed the video carousel from the sign-in page to create a clean, organic authentication experience.

Changes Made

File: `/app/auth/signin/page.tsx`

1. Removed Import

```
// REMOVED:  
import PremiumIntroVideo from "@/components/intro/premium-intro-video"
```

2. Removed Video Section

Removed the entire `PremiumIntroVideo` component section that was displaying above the sign-in form.

3. Improved Layout

Before:

- Video section at the top
- Welcome message below video
- Sign-in form at bottom
- Full-width layout with multiple sections

After:

- Clean, centered layout with `flex items-center justify-center`
- Welcome message prominently displayed
- Sign-in form directly below welcome message
- Constrained to `max-w-md` for better readability
- Vertically centered on the page

Current State

Sign-In Page (`/auth/signin`)

- ✓ **Clean and simple** - No video elements
- ✓ **Centered layout** - Professional authentication experience
- ✓ **Focused design** - Welcome message + sign-in form only
- ✓ **Responsive** - Works well on all screen sizes

Landing Page (`/`)

- ✓ **Video carousel preserved** - Still displays for non-authenticated users
- ✓ **No changes made** - Landing page functionality intact

Sign-Up Page (`/auth/signup`)

- ✓ **Already clean** - Never had video elements
- ✓ **Consistent design** - Matches sign-in page approach

Verification

Build Status

- ✓ Build completed successfully
- ✓ No TypeScript errors
- ✓ No import errors
- ✓ All pages compile correctly

Layout Improvements

- **Vertical centering**: Content is centered both horizontally and vertically
- **Better spacing**: Increased margin between welcome message and form (`mb-8`)
- **Larger welcome text**: Improved heading size (`text-3xl lg:text-4xl`)
- **Consistent width**: Form constrained to `max-w-md` for optimal readability

User Experience

Before

- Video played automatically on sign-in page
- Could be distracting for returning users
- Extra content to load and render

After

- Instant focus on authentication
- Clean, professional appearance
- Faster page load (no video assets)
- Better for returning users who want quick access

Technical Details

Components

- **Preserved**: `SignInForm` component (core functionality)
- **Removed**: `PremiumIntroVideo` component
- **Maintained**: Authentication logic and redirects

Styling

- Background: `bg-gradient-to-br from-slate-900 via-slate-800 to-slate-900`
- Layout: Flexbox with center alignment
- Typography: White text with proper contrast
- Spacing: Proper padding and margins for readability

Next Steps

No further action required. The sign-in page is now:

1. ☒ Clean and simple
 2. ☒ Free of video elements
 3. ☒ Properly tested and built
 4. ☒ Ready for deployment
