Issues & Notes

PPA Tour Access Issue

The PPA Tour website (ppatour.com) returned a 403 Forbidden error, indicating they may be blocking automated scraping. This is a known issue that may require:

- Alternative data fetching methods
- API access if available
- Manual intervention or contact with PPA Tour

Database Operations

All 14 tournaments were successfully updated in the PostgreSQL database. No new tournaments were created, indicating all fetched events already existed in the system and were refreshed with current data.

Next Steps

- Monitor PPA Tour access in future runs
- Consider implementing retry logic or alternative data sources for PPA
- Continue automated updates every 6 hours as scheduled
