

Mindful Champion - Vercel Deployment Summary

Current Status

✅ Project is ready for Vercel deployment!

- Build tested successfully (✅ No errors)
 - Environment variables documented
 - DNS configuration guide prepared
 - Deployment scripts created
-

What's Been Prepared

1. Configuration Files

- ✅ `vercel.json` - Optimized for Vercel (X-Frame-Options header removed for embedding)
- ✅ `next.config.js` - Build configuration ready
- ✅ `package.json` - All dependencies configured
- ✅ `.env.production.example` - Template for production environment variables

2. Documentation Created

- 📖 `VERCEL_DEPLOYMENT_GUIDE.md` - Complete step-by-step deployment guide
- 📌 `DNS_CONFIGURATION.md` - NameBright DNS setup instructions
- 📦 `.env.production.example` - Environment variables reference

3. Deployment Script

- 🛠️ `deploy-to-vercel.sh` - Helper script for CLI deployment
-

Next Steps (Choose Your Path)

Option A: Deploy via Vercel Dashboard (Recommended)

Best for: First-time deployment, easier environment variable management

1. **Push code to GitHub** (if not already done)
2. **Go to Vercel:** <https://vercel.com/new>
3. **Import repository** and connect your GitHub repo
4. **Set root directory:** `nextjs_space`
5. **Add environment variables** (see section below)
6. **Deploy!**

Option B: Deploy via Vercel CLI

Best for: Quick deployments, command-line enthusiasts

1. Authenticate:

```
bash
npx vercel login
```

(Visit the URL provided and authorize)

2. Deploy:

```
bash
cd /home/ubuntu/mindful_champion/nextjs_space
npx vercel --prod
```

3. Add environment variables:

```
bash
npx vercel env add DATABASE_URL production
npx vercel env add NEXTAUTH_SECRET production
npx vercel env add NEXTAUTH_URL production
# ... (see full list in .env.production.example)
```

Required Environment Variables

You **MUST** set these in Vercel for the app to function:

Core Services

```
DATABASE_URL=postgresql://neondb_owner:npg_ot6vpw5FUenm@ep-autumn-block-a4jw6pd9-pooler.us-east-1.aws.neon.tech/neondb?sslmode=require
```

```
NEXTAUTH_SECRET=9qwR8NtHtNaIlNL4pKS1CTQupo4SCZS
NEXTAUTH_URL=https://mindfulchampion.com
```

```
ABACUSAI_API_KEY=19050ea030924f3dbc432d96ecbd0a89
```

AI & Voice Services

```
HEYGEN_API_KEY=sk_V2_hgu_k5SScsSroGg_MImIKliTzpJ2ybwSBu7QyLHcj6563co
```

```
ELEVENLABS_API_KEY=sk_341119081c86246051f03f80fc959fcfa2b23d31c8f334ec
```

Communication

```
TWILIO_ACCOUNT_SID=AC17edda1e6d788cf548dc5d99300b2a66
TWILIO_AUTH_TOKEN=37392be756b3418f7cae255c94f5a0a4
TWILIO_PHONE_NUMBER=+18556429735
```

File Storage (Choose One)

Option 1: Vercel Blob Storage (Recommended)

```
BLOB_READ_WRITE_TOKEN=[Get from Vercel Storage]
```

To set up:

1. Go to <https://vercel.com/storage>
2. Create a Blob store
3. Copy the token
4. Add as environment variable

Option 2: Your Own AWS S3

```
AWS_ACCESS_KEY_ID=[your_key]
AWS_SECRET_ACCESS_KEY=[your_secret]
AWS_REGION=us-west-2
AWS_BUCKET_NAME=[your_bucket]
AWS_FOLDER_PREFIX=uploads/
```

Optional Services

```
RESEND_API_KEY=[if_using_email]
STRIPE_SECRET_KEY=[if_using_payments]
STRIPE_WEBHOOK_SECRET=[if_using_payments]
```

Custom Domain Setup

After Deployment:

1. **In Vercel Dashboard:**
 - Go to **Settings > Domains**
 - Click "Add Domain"
 - Enter: `mindfulchampion.com`
 - Vercel will provide DNS records
2. **In NameBright:**
 - Login at <https://www.namebright.com>
 - Go to **Domain Manager > Manage DNS**
 - Add Vercel's A record and CNAME
 - See `DNS_CONFIGURATION.md` for details
3. **Wait for DNS:**
 - Propagation: 15-60 minutes
 - SSL certificate: Auto-issued by Vercel
 - Verify at: <https://dnschecker.org>

DNS Records to Add:

Type: A
Host: @
Value: 76.76.21.21
TTL: 3600

Type: CNAME
Host: www
Value: cname.vercel-dns.com
TTL: 3600

✓ Post-Deployment Checklist

Once deployed and DNS is configured:

Functionality Tests

- [] Site loads at <https://mindfulchampion.com>
- [] SSL certificate active (green padlock)
- [] Login/Signup works
- [] Coach Kai loads and responds
- [] Video upload works
- [] Drill library displays
- [] Tournament calendar loads
- [] Community features work
- [] Database operations work
- [] Push-to-Talk button works

Configuration Verification

- [] All environment variables set in Vercel
- [] NEXTAUTH_URL points to production domain
- [] Database connection working
- [] File uploads functioning (Blob or S3)
- [] No console errors in browser
- [] All API endpoints responding

Troubleshooting

Build Fails

- Check Vercel build logs for specific errors
- Verify all environment variables are set
- Ensure `nextjs_space` is set as root directory

“Missing Environment Variables” Error

- Go to Vercel dashboard > Settings > Environment Variables
- Add missing variables from `.env.production.example`
- Redeploy after adding variables

Authentication Not Working

- Verify NEXTAUTH_URL is set to `https://mindfulchampion.com`
- Check NEXTAUTH_SECRET is set
- Ensure DATABASE_URL is correct

Database Connection Failed

- Test connection: `npx prisma db pull`
- Verify Neon database allows Vercel IPs
- Check DATABASE_URL format and credentials

DNS Not Resolving

- Wait 15-60 minutes for propagation
- Clear browser cache
- Check at <https://dnschecker.org>
- Verify records are correct in NameBright

Resources

- **Full Deployment Guide:** `VERCEL_DEPLOYMENT_GUIDE.md`
- **DNS Instructions:** `DNS_CONFIGURATION.md`
- **Environment Variables:** `.env.production.example`
- **Vercel Docs:** <https://vercel.com/docs>
- **Support:** <https://vercel.com/support>

Pro Tips

1. **Test First:** Deploy without custom domain initially to test functionality
2. **Environment Variables:** Set all variables BEFORE first deployment
3. **DNS Propagation:** Use incognito mode to avoid cache issues
4. **Monitoring:** Check Vercel's runtime logs for errors
5. **Backups:** Keep a copy of all environment variables
6. **SSL:** Vercel handles this automatically once DNS is verified

You're Ready!

Your Mindful Champion app is fully prepared for Vercel deployment. Follow the steps above and you'll be live at <https://mindfulchampion.com> in no time!

Need help? Refer to the detailed guides:

- `VERCEL_DEPLOYMENT_GUIDE.md` - Complete deployment walkthrough
- `DNS_CONFIGURATION.md` - NameBright DNS setup

Good luck!
