

DNS Configuration for mindfulchampion.com

NameBright DNS Setup Instructions

Once you've deployed to Vercel and added your custom domain, you'll need to update your DNS records at NameBright.

Step-by-Step Instructions

1. Get DNS Records from Vercel

After adding `mindfulchampion.com` as a custom domain in Vercel:

1. Go to your project settings in Vercel
2. Navigate to **Domains** section
3. You'll see DNS configuration instructions showing:
 - An **A record** for the root domain
 - A **CNAME record** for `www` subdomain

2. Login to NameBright

1. Go to <https://www.namebright.com>
2. Click **Sign In** (top right)
3. Enter your credentials

3. Access DNS Management

1. Click **My Account** in the top menu
2. Select **Domain Manager**
3. Find `mindfulchampion.com` in your domain list
4. Click the **Manage DNS** or **DNS** button next to the domain

4. Configure DNS Records

For Root Domain (@):

A Record:

Type: A
Host: @ (or leave blank **for** root)
Points to: 76.76.21.21
TTL: 3600 (or Auto)

 **Important:** The IP address above is Vercel's standard A record IP. However, Vercel may show you a different IP in your dashboard. **Use the IP provided by Vercel** if it differs.

For WWW Subdomain:

CNAME Record:

```
Type:      CNAME
Host:      www
Points to: cname.vercel-dns.com
TTL:      3600 (or Auto)
```

5. Remove Conflicting Records

IMPORTANT: Before adding new records, remove any existing records that might conflict:

- Remove any existing **A records** pointing to other IPs
- Remove any existing **CNAME records** for the root domain (@)
- Remove any **AAAA records** (IPv6) if present
- Keep only the new Vercel records

6. Save Changes

1. Click **Save** or **Update** to apply changes
2. DNS changes typically propagate within **15-60 minutes**
3. Some changes may be immediate, others can take up to 24 hours

Verification

Check DNS Propagation

Use these tools to verify your DNS changes:

1. **DNS Checker:** <https://dnschecker.org>
 - Enter: `mindfulchampion.com`
 - Select: A record
 - Should show: `76.76.21.21` globally
2. **What's My DNS:** <https://www.whatsmydns.net>
 - Enter: `mindfulchampion.com`
 - Type: A
 - Should propagate worldwide within an hour

3. Command Line Check:

```
bash
dig mindfulchampion.com
dig www.mindfulchampion.com
```

Expected Results:

For mindfulchampion.com:

```
mindfulchampion.com.    3600    IN      A       76.76.21.21
```

For www.mindfulchampion.com:

```
www.mindfulchampion.com. 3600    IN      CNAME   cname.vercel-dns.com.
```

SSL Certificate

Vercel will automatically provision a **Let's Encrypt SSL certificate** once:

1. DNS records are verified
2. Domain ownership is confirmed

This usually takes **5-15 minutes** after DNS propagation.

You'll see:

-  **Valid Certificate** in Vercel dashboard
-  **Green padlock** when visiting <https://mindfulchampion.com>

Troubleshooting

DNS Not Propagating

- Wait 15-60 minutes after making changes
- Clear your browser cache: `Ctrl+Shift+Del` (or `Cmd+Shift+Del` on Mac)
- Try incognito/private browsing mode
- Check DNS at <https://dnschecker.org>

SSL Certificate Not Issuing

- Ensure DNS is fully propagated (check dnschecker.org)
- Verify A record points to correct Vercel IP
- Wait 15 minutes and refresh Vercel dashboard
- If still failing, try removing and re-adding the domain

“Invalid Configuration” Error in Vercel

- Double-check DNS records match exactly
- Ensure no conflicting records exist
- Verify domain is not locked or in pending transfer

Site Showing 404 or Old Content

- Clear browser cache
- Try different browser or incognito mode
- Verify deployment is successful in Vercel
- Check that NEXTAUTH_URL is set to `https://mindfulchampion.com`

Alternative: Using Vercel Nameservers (Optional)

If you want Vercel to manage all DNS for your domain:

1. In Vercel Dashboard:

- Go to Domains settings
- Look for “Use Vercel Nameservers” option
- Note the nameservers provided (e.g., `ns1.vercel-dns.com`)

2. In NameBright:

- Go to domain management
- Find “Nameservers” section
- Change from NameBright nameservers to Vercel’s
- Save changes

 **Warning:** This will transfer ALL DNS control to Vercel, including email records if you have any.

Final Checklist

Before considering DNS setup complete:

- ☐ A record added for root domain (@)
 - ☐ CNAME record added for www
 - ☐ Old/conflicting records removed
 - ☐ Changes saved in NameBright
 - ☐ DNS propagation verified at dnschecker.org
 - ☐ SSL certificate issued in Vercel (green checkmark)
 - ☐ Site loads at <https://mindfulchampion.com>
 - ☐ Site loads at <https://www.mindfulchampion.com>
 - ☐ Both URLs show green padlock (SSL active)
 - ☐ Site functions correctly (login, features, etc.)
-
