

Mindful Champion - Vercel Deployment Guide

Overview

This guide will help you deploy Mindful Champion to Vercel and configure the custom domain **mindfulchampion.com**.

Prerequisites

- Vercel account (sign up at <https://vercel.com> if you don't have one)
- GitHub repository connected to your project (or manual deployment via CLI)
- Domain registrar access (NameBright for mindfulchampion.com)

Deployment Methods

Method 1: Vercel Dashboard (Recommended)

Step 1: Connect GitHub Repository

1. Go to <https://vercel.com/new>
2. Click "Import Git Repository"
3. Select or connect your GitHub repository
4. Set the root directory to: `nextjs_space`
5. Click "Deploy"

Step 2: Configure Environment Variables

In the Vercel dashboard, go to **Settings > Environment Variables** and add:

Required Variables:

```
DATABASE_URL=postgresql://neondb_owner:npg_ot6vpw5FUenm@ep-autumn-block-a4jw6pd9-pool-er.us-east-1.aws.neon.tech/neondb?sslmode=require

NEXTAUTH_SECRET=9qWR8NtHtNaIlNL4pKS1CTQupo4SCZS
NEXTAUTH_URL=https://mindfulchampion.com

ABACUSAI_API_KEY=19050ea030924f3dbc432d96ecbd0a89

HEYGEN_API_KEY=sk_V2_hgu_k5SScsSroGg_MImIKliTzpJ2ybwzSBu7QyLHcj6563co

ELEVENLABS_API_KEY=sk_341119081c86246051f03f80fc959fcfa2b23d31c8f334ec

TWILIO_ACCOUNT_SID=AC17edda1e6d788cf548dc5d99300b2a66
TWILIO_AUTH_TOKEN=37392be756b3418f7cae255c94f5a0a4
TWILIO_PHONE_NUMBER=+18556429735
```

Optional Variables (if you have them):

```
RESEND_API_KEY=[your_resend_api_key]
STRIPE_SECRET_KEY=[your_stripe_secret_key]
STRIPE_WEBHOOK_SECRET=[your_stripe_webhook_secret]
```

For File Uploads (choose one):

Option A: Vercel Blob Storage (Recommended for Vercel)

```
BLOB_READ_WRITE_TOKEN=[from_vercel_storage]
```

- Go to <https://vercel.com/storage>
- Create a Blob store
- Copy the token and add it as environment variable

Option B: Your Own AWS S3

```
AWS_ACCESS_KEY_ID=[your_aws_key]
AWS_SECRET_ACCESS_KEY=[your_aws_secret]
AWS_REGION=us-west-2
AWS_BUCKET_NAME=[your_bucket_name]
AWS_FOLDER_PREFIX=uploads/
```

Method 2: Vercel CLI

Step 1: Install and Login

```
cd /home/ubuntu/mindful_champion/nextjs_space
npm install -g vercel
vercel login
```

Step 2: Deploy

```
vercel --prod
```

Step 3: Set Environment Variables

```
vercel env add DATABASE_URL production
vercel env add NEXTAUTH_SECRET production
vercel env add NEXTAUTH_URL production
vercel env add ABACUSAI_API_KEY production
vercel env add HEYGEN_API_KEY production
vercel env add ELEVENLABS_API_KEY production
vercel env add TWILIO_ACCOUNT_SID production
vercel env add TWILIO_AUTH_TOKEN production
vercel env add TWILIO_PHONE_NUMBER production
```

Custom Domain Configuration

Step 1: Add Domain in Vercel

1. Go to your project in Vercel dashboard
2. Navigate to **Settings > Domains**
3. Click "Add Domain"
4. Enter: `mindfulchampion.com`
5. Click "Add"

Step 2: Configure DNS at NameBright

Vercel will provide you with DNS records. You'll need to add these at NameBright:

For Root Domain (mindfulchampion.com):

1. Log into NameBright at <https://www.namebright.com>
2. Go to **My Account > Domain Manager**
3. Find `mindfulchampion.com` and click **Manage DNS**
4. Add/Update the following records:

A Record:

```
Type: A
Host: @
Value: 76.76.21.21
TTL: 3600
```

CNAME Record (for www):

```
Type: CNAME
Host: www
Value: cname.vercel-dns.com
TTL: 3600
```

Note: The exact IP address may be different. Use the DNS records provided by Vercel dashboard.

Step 3: Wait for DNS Propagation

- DNS changes can take 5-60 minutes to propagate
- You can check status at: <https://dnschecker.org/#A/mindfulchampion.com>
- Vercel will automatically provision SSL certificate once DNS is verified

Verification Checklist

Once deployed, verify these features:

- [] Site loads at <https://mindfulchampion.com>
- [] SSL certificate is active (green padlock)
- [] User authentication works (login/signup)
- [] Coach Kai loads and responds

- [] Video analysis upload works
- [] Drill library displays correctly
- [] Tournament calendar loads
- [] Community features work
- [] Database reads/writes function

Troubleshooting

Build Failures

- Check build logs in Vercel dashboard
- Ensure all environment variables are set
- Verify Prisma schema has correct binaryTargets

Database Connection Issues

- Verify DATABASE_URL is correct
- Check if Neon database allows connections from Vercel IPs
- Test connection with: `npx prisma db pull`

Authentication Not Working

- Ensure NEXTAUTH_URL is set to production domain
- Verify NEXTAUTH_SECRET is set
- Check that callback URLs are configured correctly

File Upload Issues

- If using Vercel Blob: Check BLOB_READ_WRITE_TOKEN
- If using S3: Verify AWS credentials and bucket permissions

Important Notes

1. **Database Migration:** Vercel will automatically run `prisma generate` via postinstall script
2. **Build Command:** Configured in vercel.json as `npm run build`
3. **Environment:** All environment variables should be set in Vercel dashboard
4. **Region:** Currently set to `iad1` (Washington D.C.) in vercel.json
5. **Function Timeout:** API routes have 300s timeout, pages have 60s

Post-Deployment

Update NEXTAUTH_URL

After custom domain is verified, ensure `NEXTAUTH_URL` is set to:

```
https://mindfulchampion.com
```

Test All Features

Run through the verification checklist above.

Monitor Logs

- View logs in Vercel dashboard under **Deployments** > **[Your Deployment]** > **Runtime Logs**
- Check for any errors or warnings

Support

If you encounter issues:

- Check Vercel documentation: <https://vercel.com/docs>
- Review deployment logs in Vercel dashboard
- Verify all environment variables are set correctly
- Ensure DNS records match Vercel's requirements

Summary

Your Mindful Champion app is ready to deploy to Vercel! Follow the steps above to:

1. Deploy via Vercel dashboard or CLI
2. Set all required environment variables
3. Configure custom domain DNS
4. Verify deployment is working

Good luck with your deployment! 🚀
