

Landing Page Hero Section Fixes

Date: December 20, 2025

Commit: a231973

File Modified: components/landing/simple-landing-page.tsx

Issues Reported

User reported two critical issues visible on mobile:

Issue 1: White/Blank Button ❌

- **Problem:** Secondary “See Programs” button appeared as a blank white rectangle
- **Root Cause:** White text (`text-white`) on potentially white/light background
- **Impact:** Button was completely invisible on mobile devices

Issue 2: Background Image Too Dark ❌

- **Problem:** Hero background image (pickleball court) was barely visible
 - **Root Cause:** Image had 40% opacity + two heavy dark gradient overlays
 - **User Quote:** “so faded I can’t even see it”
-

Fixes Implemented ✅

Fix 1: Secondary Button Visibility

Before:

```
<Button
  size="lg"
  variant="outline"

  className="border-white/30 text-white hover:bg-white/10 px-8 py-6 text-lg rounded-xl
w-full sm:w-auto"
>
  See Programs
  <ArrowRight className="w-5 h-5 ml-2" />
</Button>
```

After:

```

<Button
  size="lg"
  variant="outline"
  className="border-cyan-400/50 text-cyan-400 hover:bg-cyan-400/10 hover:border-cyan-400 px-8 py-6 text-lg font-semibold rounded-xl w-full sm:w-auto backdrop-blur-sm"
>
  See Programs
  <ArrowRight className="w-5 h-5 ml-2" />
</Button>

```

Changes:

- Text color: `text-white` → `text-cyan-400` (bright cyan, always visible)
- Border: `border-white/30` → `border-cyan-400/50` (matches brand colors)
- Hover effects: Added `hover:bg-cyan-400/10` and `hover:border-cyan-400`
- Backdrop blur: Added `backdrop-blur-sm` for better readability
- Font weight: Changed to `font-semibold` for better visibility

Result: Button now clearly visible with cyan text matching the primary CTA style

Fix 2: Background Image Visibility

Before:

```

<div className="absolute inset-0">
  <Image
    src="https://images.unsplash.com/photo-1761644658016-324918bc373c?w=1920&q=80"
    alt="Pickleball players competing in an intense match"
    fill
    className="object-cover opacity-40"
    priority
  />
  <div className="absolute inset-0 bg-gradient-to-r from-slate-950 via-slate-950/80 to-transparent" />
  <div className="absolute inset-0 bg-gradient-to-t from-slate-950 via-transparent to-slate-950/50" />
</div>

```

After:

```

<div className="absolute inset-0">
  <Image
    src="https://images.unsplash.com/photo-1761644658016-324918bc373c?w=1920&q=80"
    alt="Pickleball players competing in an intense match"
    fill
    className="object-cover opacity-70"
    priority
  />
  <div className="absolute inset-0 bg-gradient-to-r from-slate-950 via-slate-950/60 to-transparent" />
  <div className="absolute inset-0 bg-gradient-to-t from-slate-950 via-transparent to-slate-950/30" />
</div>

```

Changes:

Element	Before	After	Change
Image Opacity	40%	70%	+75% brighter
Horizontal Gradient	via-slate-950/80	via-slate-950/60	-25% overlay
Vertical Gradient	to-slate-950/50	to-slate-950/30	-40% overlay

Result: Background image now clearly visible while maintaining text readability

Visual Comparison

Before:

-  “See Programs” button: White text on white = invisible
-  Background: 40% opacity + heavy overlays = barely visible court
-  User experience: Broken button, no visual impact

After:

-  “See Programs” button: Cyan text with cyan border = clearly visible
 -  Background: 70% opacity + lighter overlays = vibrant pickleball action
 -  User experience: Professional, visually engaging hero section
-

Testing Checklist

- [x] Local build successful (`npm run build`)
 - [x] Pushed to GitHub (commit a231973)
 - [x] Vercel deployment triggered
 - [] Test on mobile (iPhone/iPad) - User to verify
 - [] Test on desktop browsers
 - [] Verify button visibility in light/dark environments
 - [] Confirm background image clearly shows pickleball court/players
-

Deployment Status

- **GitHub:**  Pushed to master
 - **Vercel:**  Deployment in progress
 - **Live URL:** <https://mindfulchampion.com>
 - **Test URL:** <https://mindful-champion.vercel.app>
-

Additional Notes

Design Rationale

- **Cyan color:** Matches primary CTA button and brand color scheme
- **70% opacity:** Sweet spot between visibility and text readability
- **Backdrop blur:** Helps text stand out without heavy overlays
- **Consistent branding:** Both CTAs now use cyan color family

Mobile Optimization

- Both buttons now use `w-full sm:w-auto` for responsive sizing
- Backdrop blur ensures readability on all devices
- High contrast cyan text works in all lighting conditions

Next Steps

1. User to test on mobile devices (iPhone/iPad)
2. Verify background image is clearly visible
3. Confirm “See Programs” button is now visible and readable
4. If adjustments needed, can fine-tune opacity/gradient values

Status:  Complete - Awaiting user verification on mobile
