

Quick Testing Guide

Authentication Fix Deployed

Commit: 7db8162 - Fix: Resolve authentication logic - remove hardcoded bypass and fix user ID mismatch

Test Accounts

Test User Account

Email: deansnow59@gmail.com
Password: MindfulChampion2025!
Role: USER

Admin Account

Email: admin@mindfulchampion.com
Password: MindfulChampion2025!
Role: ADMIN

Testing Steps

Step 1: Clear Browser Cache

Option A - Clear Site Data:

1. Go to `https://mindfulchampion.com`
2. Open DevTools (F12 or Right-click → Inspect)
3. Go to **Application** tab
4. Click **Clear site data** button
5. Refresh the page

Option B - Use Incognito/Private Window:

1. Open new incognito/private window
2. Go to `https://mindfulchampion.com`

Step 2: Wait for Deployment

- Check: `https://vercel.com/dean-snows-projects/mindful-champion/deployments`
- Look for commit 7db8162
- Wait for **“Ready”** status (usually 2-3 minutes)

Step 3: Test Login

1. Go to `https://mindfulchampion.com/auth/signin`
2. Enter credentials (use test account above)

3. Click **Sign In**

✓ Expected Results

Successful Login:

- ✓ No “Invalid email or password” error
- ✓ Redirects to `/dashboard` automatically
- ✓ Dashboard loads with user data
- ✓ Can see “Welcome Back, Champion!” message

Vercel Logs (if checking):

```
[AUTH] ===== AUTHORIZE START =====
[AUTH] Step 1: Looking up user in database...
[AUTH] User found: true
[AUTH] Step 2: Validating password with bcrypt...
[AUTH] Password validation result: true
[AUTH] Step 3: Updating user activity...
[AUTH] SUCCESS: Login completed for deansnow59@gmail.com
[AUTH] ===== AUTHORIZE END =====
```

✗ Troubleshooting

Still Getting “Invalid email or password”?

1. Check Deployment Status

- Verify commit `7db8162` is deployed and “Ready”
- Make sure you’re not on an old cached deployment

2. Clear Cookies Manually

Chrome/Edge: `chrome://settings/cookies/detail?site=mindfulchampion.com`
 Firefox: Preferences → Privacy → Cookies and Site Data → Manage Data
 Safari: Preferences → Privacy → Manage Website Data

3. Check Console Logs

- Open DevTools (F12)
- Go to **Console** tab
- Look for any red error messages
- Share screenshot if needed

4. Verify Environment Variables

- Go to Vercel Dashboard
- Project Settings → Environment Variables
- Verify these exist:
 - `NEXTAUTH_SECRET`
 - `NEXTAUTH_URL` = `https://mindfulchampion.com`
 - `DATABASE_URL` (Neon PostgreSQL)

Getting “Internal server error”?

This usually means:

- Wrong password (make sure you’re using `MindfulChampion2025!`)
- Environment variable missing
- Database connection issue

Check Vercel Function Logs:

1. Go to deployment page
2. Click **“View Function Logs”**
3. Look for `[AUTH]` messages
4. Share the error stack trace

What Changed?

Before:

-  Hardcoded bypass with wrong user ID (`cm8q738Kh9A2U0jg`)
-  Excessive debug logging (~100 lines)
-  User ID mismatch causing session issues

After:

-  Removed hardcoded bypass
-  Clean authentication flow
-  Correct user ID from database (`cmjxvkbv90000zyp2dgtduh97`)
-  Streamlined logging (~60 lines)
-  Improved error handling

Verification Checklist

- ☐ Vercel deployment shows “Ready” for commit `7db8162`
- ☐ Browser cache/cookies cleared
- ☐ Using correct credentials: `deansnow59@gmail.com` / `MindfulChampion2025!`
- ☐ Login redirects to dashboard
- ☐ Dashboard loads without errors
- ☐ Admin login works: `admin@mindfulchampion.com` / `MindfulChampion2025!`

Need Help?

If login still fails after completing all steps above:

1. Take Screenshots:

- Login page with error message
- DevTools Console tab (any errors)
- Vercel deployment page (showing commit `7db8162` is Ready)

2. Check Vercel Logs:

- Go to deployment
- Click "View Function Logs"
- Copy any [AUTH] related messages

3. Provide Details:

- Which browser are you using?
- Did you clear cache/cookies?
- Is the deployment showing as "Ready"?
- What exact error message do you see?

Last Updated: January 4, 2026

Status:  Fix deployed to production
