

Tournament Database Seeding - COMPLETED

Date: December 23, 2025

Summary

Successfully seeded the production database with real tournament data from PPA Tour and APP Tour.

What Was Done

1. Environment Setup

- Retrieved DATABASE_URL from Vercel environment variables
- Created local `.env` file with production database connection
- Ran `npx prisma db push` to sync schema (already in sync)

2. Created Seeding Script

- **File:** `scripts/seed-real-tournaments.ts`
- **Purpose:** Populate database with tournament data from `lib/tournaments-data.ts`
- **Features:**
 - Parses location strings into city/state
 - Maps skill levels to Prisma enum values (BEGINNER, INTERMEDIATE, ADVANCED, PRO)
 - Determines organizer based on tournament type (PPA/APP)
 - Calculates registration dates automatically
 - Sets tournament status based on start date

3. Seeding Results

 Total Tournaments Seeded: 33
 Upcoming: 13
 Completed: 20
 Errors: 0

4. Tournament Breakdown

PPA Tour Events

- **2025:** 4 tournaments
- **2026:** 13 tournaments
- **Types:** Open, Challenger
- **Locations:** FL, WI, NY, CA, TX, AZ, UT, GA, MN

APP Tour Events

- **2025:** 16 tournaments
- **Types:** Major, Tour, NextGen
- **Locations:** TX, FL, OH, NY, MO, CA, KS, MI, IL, AZ

5. Data Mapping

Skill Levels

- 3.0 → BEGINNER
- 3.5 → INTERMEDIATE
- 4.0 → INTERMEDIATE
- 4.5 → ADVANCED
- 5.0 → ADVANCED
- Pro → PRO

Tournament Formats

All tournaments include:

- SINGLES
- DOUBLES
- MIXED_DOUBLES

Registration Dates

- Registration Start: 30 days before tournament start
- Registration End: 7 days before tournament start

Database Schema Fields Populated

- `id` : Unique tournament identifier
- `name` : Tournament name
- `description` : Tournament description
- `organizerName` : PPA Tour or APP Tour
- `organizerEmail` : Contact email
- `status` : UPCOMING or COMPLETED
- `venueName` : Venue name
- `address` : Venue address
- `city` : City
- `state` : State abbreviation
- `zipCode` : Default "00000"
- `country` : USA
- `startDate` : Tournament start date
- `endDate` : Tournament end date
- `registrationStart` : Registration opening date
- `registrationEnd` : Registration closing date
- `format` : Array of tournament formats
- `skillLevels` : Array of skill levels
- `prizePool` : Prize pool amount (if available)
- `registrationUrl` : Official registration URL
- `imageUrl` : Tournament image (if available)

Next Steps

The tournament data is now live in production and ready to be displayed on the platform:

1. **Tournament Discovery Page:** `/tournaments` - Browse all tournaments
2. **Tournament Detail Pages:** `/tournaments/[id]` - View individual tournament details
3. **Tournament Calendar:** Filter by date, location, type
4. **Tournament Map:** Geographic visualization of tournaments
5. **Registration Integration:** Direct links to official registration

Files Modified/Created

1.  `scripts/seed-real-tournaments.ts` - New seeding script
2.  `.env` - Local environment file with DATABASE_URL
3.  Database - 33 tournaments seeded successfully

Verification

To verify the seeding:

```
cd /home/ubuntu/mindful_champion/nextjs_space
npx tsx scripts/seed-real-tournaments.ts
```

Or view in Prisma Studio:

```
npx prisma studio
```

Production Database

- **Provider:** Neon (PostgreSQL)
- **Connection:** Pooled connection via Neon
- **Status:**  Connected and seeded successfully

Status:  COMPLETE

Seeded By: Automated seeding script

Date: December 23, 2025
