

Tournament Data Updater - Execution Summary

Execution Date: January 3, 2026 at 17:07:49 UTC

Overview

The National Pickleball Tournament Data Updater successfully executed and updated the database with current tournament information from multiple pickleball organizations.

Execution Results

Summary Statistics

- **Total Tournaments Fetched:** 14
- **Tournaments Created:** 0
- **Tournaments Updated:** 14
- **Errors Encountered:** 1

Data Sources

✓ MLP (Major League Pickleball)

- **Status:** Success
- **Tournaments Fetched:** 6
- **Events:**
 - MLP Orlando (April 24-27, 2025 - Orlando, FL)
 - MLP Columbus (May 1-4, 2025 - Columbus, OH)
 - MLP Austin (May 23-26, 2025 - Austin, TX)
 - MLP Phoenix (May 29-June 1, 2025 - Phoenix, AZ)
 - MLP Daytona Beach (June 5-8, 2025 - Daytona Beach, FL)
 - MLP Cup (October 31-November 2, 2025 - Dallas, TX)

✓ APP Tour

- **Status:** Success
- **Tournaments Fetched:** 4
- **Events:**
 - 2025 GEICO APP Tour Championships (December 9-14, 2025 - Fort Lauderdale, FL)
 - 2026 APP Daytona Beach Open (February 18-22, 2026 - Daytona Beach, FL)
 - 2026 APP Fort Lauderdale Open (March 25-29, 2026 - Fort Lauderdale, FL)
 - 2026 Humana APP Louisville Open (October 14-18, 2026 - Louisville, KY)

✓ USA Pickleball

- **Status:** Success
- **Tournaments Fetched:** 4
- **Events:**
 - USA Pickleball National Championships (November 15-23, 2025 - San Diego, CA)

- US Open Pickleball Championships (April 11-18, 2026 - Naples, FL)
- USA Pickleball Golden Ticket - Colorado Springs (June 24-28, 2026 - Colorado Springs, CO)
- USA Pickleball Golden Ticket - Seattle (July 8-12, 2026 - Seattle, WA)

⚠️ PPA Tour

- **Status:** Error (403 Forbidden)
- **Tournaments Fetched:** 0
- **Issue:** The PPA Tour website (ppatour.com/schedule/) returned a 403 Forbidden error, preventing data retrieval
- **Note:** This is a known issue with the PPA Tour website blocking automated requests

Database Operations

All 14 tournaments were successfully updated in the PostgreSQL database:

- Updated existing tournament records with latest information
- Maintained data consistency across all fields
- Preserved streaming URLs where available (MLP events have PickleballTV streaming)

System Configuration

✅ Script Updates

- **Bash Wrapper Script:** Updated to prioritize loading DATABASE_URL from root .env file
- **Environment Loading:** Now checks /home/ubuntu/mindful_champion/.env first for database credentials
- **Execution:** Script runs successfully with proper environment configuration

⚠️ Scheduling Setup

Status: Manual execution required

The automated scheduling via cron is not currently active in this environment. To enable automated execution every 6 hours, the system administrator should:

1. **Install cron** (if not available):

```
bash
sudo apt-get update && sudo apt-get install cron
```

2. **Add cron job:**

```
bash
crontab -e
# Add this line:
0 */6 * * * cd /home/ubuntu/mindful_champion && bash scripts/run_tournament_updater.sh
>> logs/tournament_updater_cron.log 2>&1
```

3. **Alternative: Use systemd timer** (if cron is not preferred):

- Create a systemd service and timer unit
- See TOURNAMENT_UPDATER_README.md for details

Manual Execution

Until automated scheduling is configured, the updater can be run manually:

```
cd /home/ubuntu/mindful_champion
bash scripts/run_tournament_updater.sh
```

System Health

- ✓ **Database Connection:** Successful
- ✓ **Data Fetching:** 3 out of 4 sources operational
- ✓ **Database Updates:** All successful
- ✓ **Script Configuration:** Updated and working
- ⚠ **Known Issue:** PPA Tour website access restricted
- ⚠ **Scheduling:** Requires manual setup (cron not available)

Next Steps

Immediate Actions

1. ✓ Script execution verified and working
2. ✓ Environment configuration updated
3. ⚠ Set up automated scheduling (requires system administrator)

Ongoing Operations

Once scheduling is configured, the tournament updater will:

1. Run automatically every 6 hours
2. Fetch the latest tournament data from all sources
3. Update existing tournament records
4. Add new tournaments as they are announced
5. Monitor for changes in streaming URLs and event details

Technical Details

- **Script Location:** `/home/ubuntu/mindful_champion/scripts/tournament_data_updater.py`
- **Wrapper Script:** `/home/ubuntu/mindful_champion/scripts/run_tournament_updater.sh`
- **Log File:** `/home/ubuntu/mindful_champion/logs/tournament_updater.log`
- **Database:** PostgreSQL (PickleballEvent table)
- **Environment File:** `/home/ubuntu/mindful_champion/.env`
- **Execution Method:** Manual (automated scheduling pending)

Monitoring

To monitor the updater:

```
# View recent logs
tail -50 /home/ubuntu/mindful_champion/logs/tournament_updater.log

# Check last execution summary
grep "Tournament Update Summary" -A 5 /home/ubuntu/mindful_champion/logs/tournament_updater.log | tail -6

# Run manual update
cd /home/ubuntu/mindful_champion && bash scripts/run_tournament_updater.sh
```

This report was automatically generated by the Tournament Data Updater system.
