

Tournament Data Update Summary

Date: December 23, 2025 at 10:00:58 UTC

Status:  SUCCESS

Execution Results

Statistics

- **Total Tournaments Fetched:** 14
- **Tournaments Created:** 0
- **Tournaments Updated:** 14
- **Errors Encountered:** 1 (PPA Tour website returned 403 Forbidden)

Data Sources

Major League Pickleball (MLP)

- **Status:** Success
- **Tournaments Fetched:** 6
- **Events Updated:**
 - MLP Orlando (April 24-27, 2025)
 - MLP Columbus (May 1-4, 2025)
 - MLP Austin (May 23-26, 2025)
 - MLP Phoenix (May 29-June 1, 2025)
 - MLP Daytona Beach (June 5-8, 2025)
 - MLP Cup (October 31-November 2, 2025)

APP Tour

- **Status:** Success
- **Tournaments Fetched:** 4
- **Events Updated:**
 - 2025 GEICO APP Tour Championships (December 9-14, 2025)
 - 2026 APP Daytona Beach Open (February 18-22, 2026)
 - 2026 APP Fort Lauderdale Open (March 25-29, 2026)
 - 2026 Humana APP Louisville Open (October 14-18, 2026)

USA Pickleball

- **Status:** Success
- **Tournaments Fetched:** 4
- **Events Updated:**
 - USA Pickleball National Championships (November 15-23, 2025)
 - US Open Pickleball Championships (April 11-18, 2026)
 - USA Pickleball Golden Ticket - Colorado Springs (June 24-28, 2026)
 - USA Pickleball Golden Ticket - Seattle (July 8-12, 2026)

PPA Tour

- **Status:** Error (403 Forbidden)

- **Tournaments Fetched:** 0
- **Issue:** Website blocked the request with a 403 Forbidden error
- **Note:** The script includes fallback data for known PPA tournaments, but the live fetch failed

Database Operations

All 14 tournaments were successfully updated in the PostgreSQL PickleballEvent table with the latest information including:

- Event names and dates
- Locations
- Website URLs
- Streaming URLs (where available)
- Organization names

System Health

-  Database connection successful
-  Environment variables loaded correctly
-  Log file updated at `/home/ubuntu/mindful_champion/logs/tournament_updater.log`
-  All Python dependencies available

Notes

1. The PPA Tour website is blocking automated requests (403 Forbidden). This is a known issue with some tournament websites that implement bot protection.
2. All other data sources (MLP, APP Tour, USA Pickleball) are functioning correctly.
3. The script uses fallback data for known tournaments when live scraping fails.
4. All 14 tournaments already existed in the database and were updated with the latest information.
5. Fixed the updater script to properly update the `updatedAt` timestamp on each run for accurate tracking.

Next Scheduled Run

The updater is configured to run every 6 hours to keep tournament data current.
