

# Video Analysis Page - Original Images Restored

---

**Date:** December 21, 2025

**Commit:** f354279

**Issue:** Video Analysis 4-step process cards showing wrong images

---

## Problem

---

The Video Analysis page ( /train/video ) had 4 process cards with incorrect thumbnail images that were replaced with generic Unsplash stock photos:

**Incorrect Images** (Current before fix):

1. "Record Your Game" - Generic camera equipment
2. "AI Analyzes Every Shot" - Generic data analytics
3. "Review Detailed Insights" - Generic business charts
4. "Track Your Improvement" - Generic workspace laptop

These images didn't properly represent the pickleball video analysis workflow and progression.

---

## Solution

---

Restored the **original custom images** from Abacus.AI CDN that you previously liked and approved. These images show the actual progression of the video analysis process perfectly.

**Original Images Restored** (from commit c45f81f):

1. **"Record Your Game"**

<https://cdn.abacus.ai/images/e2b1aa1b-d6f2-4341-9296-324156f05f0e.png>

1. **"AI Analyzes Every Shot"**

<https://cdn.abacus.ai/images/2470ac2a-c810-4c3b-982f-f95bd2b187b6.png>

2. **"Review Detailed Insights"**

<https://cdn.abacus.ai/images/bbe20fff-0d44-4a08-90af-f116a554a05a.png>

3. **"Track Your Improvement"**

<https://cdn.abacus.ai/images/cd3440d7-0eab-48a5-b4c6-97da95c330e9.png>

---

## Technical Changes

---

**File Modified:** components/train/video-analysis-hub.tsx

**Section Updated:** 4-Step Visual Journey Cards (lines 1295-1326)

## Before:

```
{
  step: 1,
  title: "Record Your Game",
  bullets: ["Any device", "All formats", "Up to 500MB"],
  image: "https://images.unsplash.com/photo-1626224583764-f87db24ac4ea?w=400&h=300&fit=crop",
  link: "#upload-dropzone"
}
```

## After:

```
{
  step: 1,
  title: "Record Your Game",
  bullets: ["Any device", "All formats", "Up to 500MB"],
  image: "https://cdn.abacus.ai/images/e2b1aa1b-d6f2-4341-9296-324156f05f0e.png",
  link: "#upload-dropzone"
}
```

All 4 cards updated with their original Abacus.AI CDN images.

---

## Verification

- ✓ **Build Status:** Successful
  - ✓ **Deployed:** Pushed to GitHub (master branch)
  - ✓ **Vercel:** Auto-deployment triggered
  - ✓ **Images:** Restored from commit c45f81f (Dec 19, 2025)
- 

## Historical Context

These images were originally added in **commit c45f81f** ("Fix video thumbnails and spotlight-style onboarding tooltips") and were working perfectly. At some point, they were replaced with generic Unsplash images, losing the custom pickleball video analysis branding.

This restoration brings back the **approved, custom images** that properly illustrate the 4-step video analysis journey.

---

## Testing

After Vercel deployment completes (~2 minutes), verify at:

- **Live URL:** <https://mindfulchampion.com/train/video>
- **Test Account:** deansnow59@gmail.com (ADMIN, PRO)

**Expected Result:** All 4 process cards now show the original custom images with proper pickleball video analysis progression visualization.

---

## Next Steps

---

1.  **Verify on Live Site:** Check <https://mindfulchampion.com/train/video> after deployment
  2.  **Hard Refresh:** Clear cache if old images persist (Cmd+Shift+R / Ctrl+Shift+R)
  3.  **Mobile Testing:** Verify cards display correctly on iOS/iPad
- 

**Status:**  Complete and Deployed
