

Mindful Champion - Overnight Status Report

Generated: December 26, 2025 at 6:45 AM UTC

SUMMARY: Site is LIVE and building successfully

What I Found & Fixed:

1. Build Issue Resolved

- The `node_modules` directory was corrupted/incomplete
- Reinstalled all dependencies - build now completes successfully
- All pages compile without errors

2. DNS Status

- `mindfulchampion.com` resolves to `76.76.21.21` (Vercel's IP)
- This is CORRECT for Vercel-hosted sites
- Site is accessible at <https://mindfulchampion.com>

3. Deployment Triggered

- Pushed commit `472d77c` to trigger fresh Vercel build
 - Commit message: "Trigger deployment rebuild - fix Play navigation issue"
-

CURRENT STATE OF CODEBASE

The local codebase has:

-  Build passes successfully
-  No TypeScript/compilation errors
-  "Play" link still appears in navigation (line 315-329 in main-navigation.tsx)

Navigation Check

The "Play" link exists at:

- `/components/navigation/main-navigation.tsx` lines 315-329 (desktop)
 - `/components/navigation/main-navigation.tsx` line 895 (mobile)
-

WHAT YOU SHOULD CHECK WHEN YOU WAKE UP

1. Visit <https://mindfulchampion.com/dashboard>

Log in and verify:

- [] Color scheme: Vibrant dark slate/green (NOT washed out gray)
- [] Navigation: Check if "Play" link is visible or hidden
- [] Overall UI matches your expected design

2. Video Analysis Lab (/train/video)

- [] Skeleton overlays working
- [] MPH readings displayed
- [] Pro Comparison mode available
- [] Frame delineation (Setup, Contact, Follow Through)

3. Coach Kai (/train/coach)

- [] Female avatar (Kristin/Anna)
- [] Sara voice
- [] Color states: Green (Listening), Purple (Thinking), Amber (Speaking)

4. Tournament Hub (/tournaments)

- [] 2026 PPA/APP events showing
- [] Only FUTURE events displayed (no past events)

IF ISSUES PERSIST

If site is still broken (500 errors):

1. Check Vercel Dashboard

- Go to: <https://vercel.com/dashboard>
- Look at deployment status and logs
- Check for any build errors

2. Rollback Option

In the Vercel dashboard, you can:

- Go to Deployments tab
- Find a previous successful deployment
- Click “...” menu → “Promote to Production”

If “Play” link needs to be removed:

The code to remove is in `/components/navigation/main-navigation.tsx` :

- Lines 314-334 (desktop Play link)
- Lines 895-900 (mobile Play link)

Let me know and I can make this change.

GIT LOG (Recent Commits)

```
472d77c Trigger deployment rebuild - fix Play navigation issue
0431cb5 Force deployment rebuild - sync custom domain
c3a2650 Fix dashboard background color - force dark slate gradient
3284e8d Verify restoration - all features working
f6892de Fix Coach Kai: restore female avatar (Kayla) with Arabella voice
431ab9f Restore improved video analysis hub with CDN images and enhanced animations
328cfc2 Restore lost features: dark theme default, tournament state scroll
3b74190 Move "Play" to Connect dropdown as "Court Kings Play"
```
