

QUICK START FIX - Custom Domain Not Showing Latest Version

The Problem

-  Custom domain **verified** but showing **OLD version**
-  Preview URL showing **CORRECT current version**
-  **Deployment not synced** after domain verification completed

The Fix (Choose One)

Option A: Platform Console (FASTEST)

1. Go to: https://apps.abacus.ai/chatllm/?appId=apllm_engineer
2. Find “Mindful Champion” app
3. Click **“Redeploy”** or **“Rebuild”** button
4. Wait 15-30 minutes
5. Test: <https://mindfulchampion.com>

Option B: Automated Script

```
cd /home/ubuntu/mc_deploy  
./force-domain-sync.sh
```

Then wait 15-30 minutes and test.

Option C: Contact Support

- Email: support@abacus.ai
- Subject: “Custom domain deployment sync - mindfulchampion.com”
- Request: Trigger fresh deployment to sync custom domain
- Attach: CUSTOM_DOMAIN_SYNC_REPORT.md

Verification

After 15-30 minutes, check <https://mindfulchampion.com> for:

- [] Vibrant dashboard (not washed out)
- [] No “Play” link in navigation
- [] Video analysis shows “mph” readings
- [] Coach Kai is female avatar

Need Help?

Run diagnostics:

```
cd /home/ubuntu/mc_deploy  
./check-deployment-status.sh
```

See detailed guides:

- **DEPLOYMENT_SYNC_SOLUTION.md** - Step-by-step action guide
 - **CUSTOM_DOMAIN_SYNC_REPORT.md** - Full diagnostic report
-

The code is correct. Just need to trigger deployment sync. 🚀
