 - Timestamp
 - Server/environment info
 - CTA to logs/monitoring
 - **Files:**
 - `lib/email/unified-email-service.ts` - `generateSystemErrorAlertEmail()`
 - Global error handlers (trigger)
 - **Notes:** Critical alerts for system monitoring
-

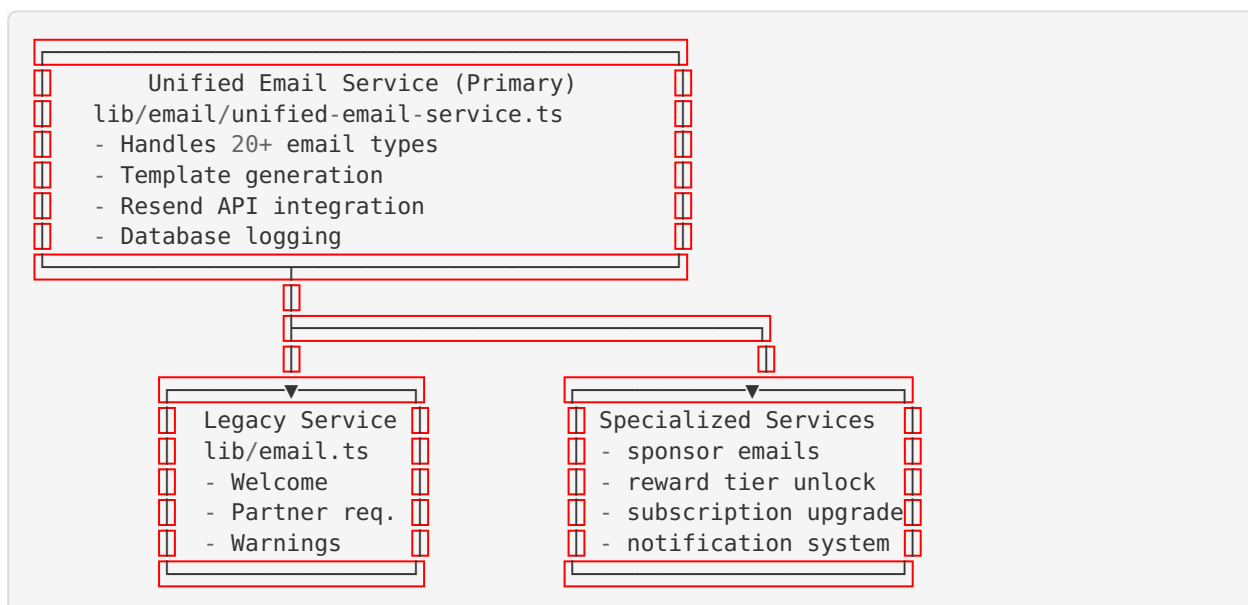

10 Testing & Utilities

10.1 Test Email

- **Type:** `CUSTOM` test email
 - **Sent When:** Admin uses test email feature
 - **From:** Mindful Champion 🏆 `<noreply@mindfulchampion.com>`
 - **Subject:** ✍️ Test Email - Mindful Champion
 - **Contains:**
 - Simple test message
 - Confirmation that email system is working
 - Timestamp
 - **Files:**
 - `lib/email/unified-email-service.ts` - `sendTestEmail()`
 - `app/api/admin/emails/test/route.ts` (trigger)
 - Admin email management dashboard
 - **Notes:** Used for testing email configuration
-

Technical Implementation

Email Service Architecture

Email Template Locations

1. **Unified Templates:** `lib/email/templates/` (organized by category)
2. **Notification Templates:** `lib/notifications/email-templates.ts` (Coach Kai personality)
3. **Specialized Templates:** Individual files in `lib/email/`

Database Logging

All emails are logged to the `EmailNotification` table with:

- User ID (if applicable)
- Email type
- Recipient info
- Subject and content
- Status (SENT/FAILED/DELIVERED)
- Resend email ID (for tracking)
- Metadata (custom fields per email type)

Email Statistics & Monitoring

Admin Dashboard Access

- **URL:** `/admin/emails`
- **Features:**
 - Email history with filters
 - Delivery statistics
 - Test email functionality
 - Custom email sender

Monitoring Endpoints

- **History:** `GET /api/admin/emails/history`

- **Test Send:** `POST /api/admin/emails/test`

Critical Notes

Domain Verification Required

 **IMPORTANT:** The Resend domain `mindfulchampion.com` must be verified in the Resend dashboard for emails to send in production.

Steps to verify:

1. Log into Resend dashboard
2. Add domain: `mindfulchampion.com`
3. Add DNS records (SPF, DKIM, DMARC) at domain registrar
4. Wait for verification (usually 24-48 hours)

See: `RESEND_DOMAIN_SETUP_GUIDE.md` for detailed instructions

Environment Variables

```
RESEND_API_KEY=re_... (required)
NEXT_PUBLIC_APP_URL=https://mindfulchampion.com
NEXTAUTH_URL=https://mindfulchampion.com
```

Rate Limiting

- **Password Reset:** 3 requests per 15 minutes per email
- **General emails:** No explicit rate limit (handled by Resend)

Email Triggers Summary

Trigger Type	Email Count	Examples
User Action	8	Signup, partner request, goal creation, redemption
Admin Action	5	Manual upgrade, warnings, sponsor approval
Automated/Cron	7	Trial expiration, daily tips, tournament reminders
System Event	4	Video complete/failed, achievement unlock, errors
Webhook	6	Payments, subscriptions, renewals
Testing	1	Test email

Total: 27 unique email types + variants (severity levels, etc.)

Next Steps for Email Enhancement

1. **Analytics Integration:** Track open rates, click rates via Resend webhooks
 2. **A/B Testing:** Test different subject lines and CTAs
 3. **Personalization:** Dynamic content based on user behavior
 4. **Unsubscribe Management:** Preference center for email types
 5. **Email Scheduling:** Queue emails for optimal send times
 6. **Template Preview:** Admin UI to preview all email templates
