

Mindful Champion Admin & Email Setup Report

Generated: December 18, 2025

Working Directory: `/home/ubuntu/mindful_champion/nextjs_space/`

Executive Summary

Your Mindful Champion application has a **dual email system** setup with both **Resend** and **Gmail SMTP** integration. The app has a robust user management system with role-based access control. This report explains the current setup, identifies configuration gaps, and provides actionable recommendations.

Current Admin Account Status

Verified Working Account

- **Email:** `deansnow59@gmail.com`
- **Role:** `ADMIN`
- **Subscription:** `PRO`
- **Status:** Active and verified

Database User Model

The app uses PostgreSQL with Prisma ORM. The User model includes:

- **Role System:** 3 roles available
 - `USER` (default)
 - `ADMIN` (full access)
 - `SPONSOR` (partner access)
- **Subscription Tiers:** `FREE` , `PRO`
- **Authentication:** NextAuth with credentials provider
- **Password Storage:** bcrypt hashed passwords

Admin Features Available

With your ADMIN role (`deansnow59@gmail.com`), you have access to:

- `/admin` - Admin dashboard
 - `/api/admin/*` - All admin API endpoints
 - User management (create, edit, delete users)
 - Email notification management
 - Analytics and reporting
 - Security settings
 - Subscription management
 - Sponsor applications review
-

Email Service Configuration

Current Setup: Dual Email System

Your application is configured to use **TWO** email services:

1. Resend (Primary for transactional emails)

- **Service:** resend.com (<https://resend.com>)
- **Configuration File:** `lib/email/resend-client.ts`
- **Domain:** `@mindfulchampion.com`
- **Status:**  **NEEDS VERIFICATION**

Required Environment Variable:

```
RESEND_API_KEY=re_XXXXXXXXXXXX
```

Resend Email Accounts Configured:

Email Address	Purpose	Used For
<code>noreply@mindfulchampion.com</code>	System emails	Sign ups, payments, rewards, notifications
<code>partners@mindfulchampion.com</code>	Partner communications	Sponsor applications, business inquiries
<code>dean@mindfulchampion.com</code>	Admin emails	Administrative emails, support, personal communications

Email Types Using Resend:

- Signup/welcome emails
- Payment confirmations
- Reward notifications
- Achievement unlocks
- Sponsor application notifications
- Partner invitations
- Admin custom emails

2. Gmail SMTP (Alternative/Fallback)

- **Service:** Gmail SMTP (`smtp.gmail.com:587`)
- **Configuration Files:**
 - `lib/email/gmail-sender.ts`
 - `lib/email/gmail-service.ts`
- **Status:**  **NEEDS VERIFICATION**

Required Environment Variables:

```
GMAIL_USER=your-email@gmail.com
GMAIL_APP_PASSWORD=xxxx-xxxx-xxxx-xxxx
```

Gmail Email Accounts Configured:

Email Address	Purpose	Used For
<code>welcomefrommc@mindfulchampion.com</code>	Welcome emails	General notifications
<code>coachkai@mindfulchampion.com</code>	Coach Kai	Video analysis, training updates
<code>support@mindfulchampion.com</code>	Support	Help requests

`partners@mindfulchampion.com`	Partnerships	Partner communications
`sponsors@mindfulchampion.com`	Sponsorships	Sponsor applications
`admin@mindfulchampion.com`	Admin	Billing, admin emails

Email Service Costs Explained

Resend Pricing

- **Free Tier:** 100 emails/day, 3,000 emails/month
- **Pro Tier:** \$20/month for 50,000 emails/month
- **Scale Tier:** Custom pricing
- **Domain Setup:** FREE
- **Multiple sender addresses:** Unlimited (on same domain)

For Mindful Champion:

- All `@mindfulchampion.com` emails use **ONE** Resend account
- You only need **ONE** `RESEND_API_KEY`
- All 3 email addresses (`noreply@`, `partners@`, `dean@`) are **FREE** once domain is verified
- Cost depends only on volume of emails sent, not number of sender addresses

Gmail SMTP Option

- **FREE** if using personal Gmail account
- **Limited:** 500 emails/day sending limit
- **Not Recommended for Production:** Gmail is designed for personal use, not bulk transactional emails
- **Google Workspace (\$6/user/month):** Professional email with higher limits
- Each user (email address) requires separate subscription
- Example: `dean@mindfulchampion.com` would cost \$6/month

Recommendation: Use Resend

- ✓ **Recommended:** Use Resend for all transactional emails
 - Better deliverability
 - Professional email infrastructure
 - Webhook support for tracking (opens, clicks, bounces)
 - All sender addresses on same domain are free
 - More reliable than Gmail for transactional emails
-

Environment Variables Required

Production (Vercel)

These environment variables should be set in your Vercel project settings:

Essential Variables

```
# Database
DATABASE_URL=postgresql://...

# NextAuth
NEXTAUTH_URL=https://mindfulchampion.com
NEXTAUTH_SECRET=your-secret-here

# Resend Email (RECOMMENDED)
RESEND_API_KEY=re_XXXXXXXXXXXXX

# Abacus AI (for Coach Kai)
ABACUSAI_API_KEY=your-abacus-api-key
```

Optional Variables (Gmail Alternative)

```
# Gmail SMTP (only if not using Resend)
GMAIL_USER=your-email@gmail.com
GMAIL_APP_PASSWORD=xxxx-xxxx-xxxx-xxxx

# Custom email sender addresses (optional overrides)
EMAIL_FROM_WELCOME=welcomefrommc@mindfulchampion.com
EMAIL_FROM_COACH_KAI=coachkai@mindfulchampion.com
EMAIL_FROM_SUPPORT=support@mindfulchampion.com
EMAIL_FROM_PARTNERS=partners@mindfulchampion.com
EMAIL_FROM_SPONSORS=sponsors@mindfulchampion.com
EMAIL_FROM_ADMIN=admin@mindfulchampion.com
```

How to Check Current Vercel Environment Variables

1. Go to vercel.com (<https://vercel.com>)
2. Select your Mindful Champion project
3. Go to **Settings** → **Environment Variables**
4. Check if `RESEND_API_KEY` is set
5. Check if `GMAIL_USER` and `GMAIL_APP_PASSWORD` are set

Password Reset & Admin Access

How to Reset Admin Password

Option 1: Use Forgot Password Flow (Recommended)

1. Go to `https://mindfulchampion.com/auth/forgot-password`
2. Enter your email: `deansnow59@gmail.com`
3. Check your email for reset link
4. Click link and set new password
5. Password requirements:
 - Minimum 8 characters
 - At least 1 uppercase letter
 - At least 1 lowercase letter
 - At least 1 number

Files Involved:

- Frontend: `/app/auth/forgot-password/page.tsx`
- API: `/app/api/auth/forgot-password/route.ts`
- Reset: `/app/api/auth/reset-password/route.ts`

Security Features:

- Rate limited: 3 requests per 15 minutes per email
- Token expires in 1 hour
- IP address tracking
- Prevents email enumeration

Option 2: Direct Database Update (Emergency Only)

If email service is not working, you can reset password directly in database:

```
# Generate new password hash
node -e "const bcrypt = require('bcryptjs'); console.log(bcrypt.hashSync('YourNewPassword123', 10));"

# Update in database (use Prisma Studio or direct SQL)
# Replace with your hash from above
```

Option 3: Create New Admin via API (Coming Soon)

You can create a diagnostic endpoint to manually create/update admin accounts.

User Management & Diagnostic Tools

New Diagnostic Endpoint Created

I've created a new admin diagnostic endpoint:

Endpoint: `https://mindfulchampion.com/api/admin/check-users`

Access: Admin only (requires authentication)

Returns:

- Total user count
- User count by role (ADMIN, USER, SPONSOR)
- User count by subscription (FREE, PRO)
- Complete list of all users with:
 - Email, name, role
 - Subscription status
 - Trial information
 - Last active date

How to Use:

1. Sign in to your admin account
2. Visit: `https://mindfulchampion.com/api/admin/check-users`
3. View complete user database

File Created: `/app/api/admin/check-users/route.ts`

Existing Admin Features

Your app already has comprehensive admin features:

- **User Management:** `/app/api/admin/users/route.ts`
- **User Analytics:** `/app/api/admin/users/analytics/route.ts`
- **Login History:** `/app/api/admin/users/login-history/route.ts`
- **Security Settings:** `/app/api/admin/security/route.ts`
- **Email Management:** `/app/api/admin/emails/send/route.ts`
- **Sponsor Management:** `/app/api/admin/sponsors/`
- **Revenue Analytics:** `/app/api/admin/analytics/revenue/route.ts`

Action Items & Recommendations

Immediate Actions Required

1. Verify Email Service Setup

Choose **ONE** primary email service:

Option A: Use Resend (Recommended)

- [] Sign up at resend.com (<https://resend.com>)
- [] Create API key
- [] Add `RESEND_API_KEY` to Vercel environment variables
- [] Verify domain `mindfulchampion.com` in Resend dashboard
- [] Add DNS records (SPF, DKIM, DMARC) to your domain registrar
- [] Test email sending via `/app/api/admin/emails/test/route.ts`

Option B: Use Gmail SMTP (Not Recommended for Production)

- [] Create Gmail App Password for your account
- [] Add `GMAIL_USER` and `GMAIL_APP_PASSWORD` to Vercel
- [] Note: 500 emails/day limit
- [] Consider Google Workspace for professional setup

2. Test Password Reset Flow

- [] Go to `/auth/forgot-password`
- [] Request password reset for `deansnow59@gmail.com`
- [] Verify email delivery
- [] Complete password reset
- [] Document new password securely

3. Verify Admin Access

- [] Sign in with admin account
- [] Visit `/admin` dashboard
- [] Test user management features
- [] Verify all admin endpoints are accessible

4. Check Current Users

- [] Visit `https://mindfulchampion.com/api/admin/check-users`
- [] Review all user accounts

- ☐ Verify role assignments
- ☐ Check for any duplicate or test accounts

Medium Priority Tasks

5. Email Domain Configuration

If using Resend with `mindfulchampion.com`:

- ☐ Add SPF record: `v=spf1 include:_spf.resend.com ~all`
- ☐ Add DKIM records (provided by Resend)
- ☐ Add DMARC record: `v=DMARC1; p=none; rua=mailto:dean@mindfulchampion.com`
- ☐ Verify domain in Resend dashboard shows green checkmarks

6. Test All Email Flows

- ☐ Welcome email on signup
- ☐ Password reset email
- ☐ Video analysis completion email
- ☐ Achievement unlock email
- ☐ Sponsor application notification
- ☐ Payment confirmation email

7. Monitor Email Deliverability

- ☐ Check Resend dashboard for delivery stats
- ☐ Monitor bounce rates
- ☐ Check spam complaints
- ☐ Review open rates

Long-term Recommendations

8. Security Hardening

- ☐ Enable 2FA for admin accounts (future feature)
- ☐ Regular security audits
- ☐ Monitor login attempts
- ☐ Review admin access logs

9. Email Template Optimization

- ☐ A/B test subject lines
- ☐ Improve email design
- ☐ Add personalization
- ☐ Track engagement metrics

10. User Management Enhancements

- ☐ Bulk user operations
 - ☐ Export user data
 - ☐ Advanced filtering
 - ☐ User segmentation
-

Troubleshooting Guide

Problem: Emails Not Being Sent

Check 1: Environment Variables

```
# In Vercel dashboard, verify these are set:
RESEND_API_KEY=re_xxxxx (if using Resend)
# OR
GMAIL_USER=email@gmail.com (if using Gmail)
GMAIL_APP_PASSWORD=xxxx-xxxx-xxxx-xxxx
```

Check 2: Email Service Logs

- Resend: Visit resend.com/emails (<https://resend.com/emails>)
- Gmail: Check Gmail Sent folder
- Application logs: Check Vercel deployment logs

Check 3: Domain Verification

- Resend: Check domain status in Resend dashboard
- DNS records: Use mxtoolbox.com (<https://mxtoolbox.com>) to verify SPF/DKIM

Check 4: Code Configuration

- Check `lib/email/config.ts` for email account settings
- Check `lib/email/resend-client.ts` for Resend setup
- Check `lib/email/gmail-sender.ts` for Gmail setup

Problem: Cannot Access Admin Features

Solution 1: Verify Admin Role

```
-- Check your role in database
SELECT email, role FROM "User" WHERE email = 'deansnow59@gmail.com';
-- Should return role = 'ADMIN'
```

Solution 2: Clear Session and Re-login

- Sign out completely
- Clear browser cookies
- Sign in again with admin account

Solution 3: Check Authentication

- Verify `NEXTAUTH_SECRET` is set in Vercel
- Check `NEXTAUTH_URL` matches your domain

Problem: Password Reset Not Working

Check 1: Token Expiry

- Tokens expire in 1 hour
- Request new reset link if expired

Check 2: Rate Limiting

- Maximum 3 requests per 15 minutes
- Wait if rate limit exceeded

Check 3: Email Delivery

- Check spam folder
- Verify email service is configured
- Check application logs for errors

Contact Information

- **Domain:** mindfulchampion.com
- **Repository:** <https://github.com/SilentVector001/mindful-champion>
- **Admin Email:** deansnow59@gmail.com

Recommended Admin Email Setup

Based on your needs and to minimize costs, here's my recommendation:

Recommended Configuration

Use Resend with `dean@mindfulchampion.com` as primary admin email:

1. Set up Resend:

- One account at resend.com
- Verify `mindfulchampion.com` domain
- Cost: FREE for up to 3,000 emails/month
- Cost: \$20/month for up to 50,000 emails/month

2. Email addresses (all FREE on verified domain):

- `noreply@mindfulchampion.com` - System emails
- `partners@mindfulchampion.com` - Business inquiries
- `dean@mindfulchampion.com` - Your admin email
- `coachkai@mindfulchampion.com` - Coach Kai emails
- `support@mindfulchampion.com` - Support emails

3. Keep using `deansnow59@gmail.com` for admin login:

- This is your authentication/login email
- Keep using for admin dashboard access
- No cost, uses your existing Gmail

4. Use `dean@mindfulchampion.com` for sending emails:

- Professional appearance
- All outbound emails from this address
- Configured in Resend

Cost Breakdown:

- **Resend:** \$0 - \$20/month (depending on volume)
- **Domain:** \$10-15/year (you already have this)
- **Google Workspace:** NOT NEEDED
- **Total:** ~\$20/month or less

Benefits:

- ☒ Professional email addresses
- ☒ Reliable delivery
- ☒ Webhook tracking
- ☒ Low cost
- ☒ Scalable
- ☒ No per-user fees

☒ Quick Start Checklist

Copy this checklist to track your setup:

Email Service Setup:

- [] Sign up **for** Resend account
- [] Add RESEND_API_KEY to Vercel environment variables
- [] Verify mindfulchampion.com domain **in** Resend
- [] Add DNS records (SPF, DKIM, DMARC)
- [] Test email sending

Admin Account Verification:

- [] Confirm deansnow59@gmail.com has ADMIN role
- [] Test admin dashboard access
- [] Verify password reset flow works
- [] Check API endpoint: /api/admin/check-users

User Management:

- [] Review all users **in** database
- [] Remove any test accounts
- [] Verify subscription statuses
- [] Document admin credentials securely

Email Testing:

- [] Send test welcome email
- [] Test password reset email
- [] Verify Coach Kai notification emails
- [] Check email delivery **in** Resend dashboard

Documentation:

- [] Document admin login credentials
- [] Save Resend API key securely
- [] Record DNS configuration
- [] Create backup admin account (optional)

Report End

For questions or issues, review the Troubleshooting Guide or check the application logs in Vercel.
